Documentation 

Alibaba Cloud Object Storage Service (OSS) is an easy-to-use service that enables you to store, backup and archive large amounts of data on the cloud.

OSS guarantees up to 99.9% availability and is available at no upfront cost or long-term commitment. It is a perfect fit for global teams and international project management.

Benefits

Available

99.9% availability and 99.999999999% data reliability.

Secure

Provides multi security and protects against DDoS attacks.

Scalable

Scales storage capacity based on your application's real-time requirements.

No limit on data storage.

Secure

Quickly and efficiently processes more than 50,000 requests per second.

Ensures fast connectivity within region using Border Gateway Protocol multi-line network access system.

Customer Testimonials

Alibaba Cloud reduces investment costs in IT and simplifies maintenance allowing us more time to focus on the development of our application.

Alibaba Cloud not only provides great cloud solutions, but is also backed up with good technical support which helps you quickly with answers for your issues when you need it.

We use OSS for image and video storage. With it, we don't need to worry about memory space, performance, data loss, or other infrastructure issues. When a user shares a video, we upload it to the CDN, which significantly reduces server workload.
